**NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING
APPLICATIONS**

On July 17, 2018, Midwest Energy Recycling, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Chippewa County Pumped Storage Project to be located near the Minnesota River and the city of Granite Falls, in Chippewa County, Minnesota. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a new circular 100-acre rockfill embankment (upper reservoir) having a total storage capacity of 3,000 acre-feet with a maximum pond elevation level of 1080 feet mean sea level; (2) a new 2,400-foot by 1,425-foot rectangular lower reservoir with a total storage capacity of 3,300 acre-feet; (3) a new 100-foot-diameter, reinforced concrete (morning glory type) intake connected to a vertical 2,500-foot-long by 18-foot-diameter steel penstock; (4) a new 200-foot-long by 70-foot-wide by 40-foot-high reinforced concrete powerhouse containing two new 333-megawatt (MW) reversible pump turbine units with a total plant rating of 666 MW;

(5) a new 50-foot-wide, 240-foot-long, 40-foot-high transformer gallery; (6); a new 200 to 1,000-foot-long, 230-kilovolt transmission line extending from the transformer gallery to an existing substation (the point of interconnection); and (7) appurtenant facilities. The estimated annual generation of the Chippewa County Pumped Storage Project would be 1,450 gigawatt-hours.
